

FIF 2012-05

6 December 2012

SUBJECT: Renewal FNPT certificate

The BE-FNPT 007 certificate (DA42 sim based in Brussels) has been renewed recently. The findings of the BCAA resulted in 2 restrictions on the certificate:

“Be advised that following restrictions do apply to BE-FNPT 007:

- Back up battery for FADEC not simulated
- Trim runaway failure not simulated in AP mode

Do not generate non-normal scenarios that would involve these two systems as it would generate confusion / negative training”

Please confirm acknowledgement of this FIF in ETA with your PIN.

Thanks for your usual cooperation,

The Training Staff.
