

Researching open discrepancies using RMS report:

1. Log in to RMS using mx as username and 1234 as password. (not shown below – see link in ETA)
2. Select Report on the main menu selection on the left.
3. Name of report is Resource Discrepancy Status.
4. Carefully select filter options to obtain exactly the data you need.
 - a. Enter the date range. If looking for deferred items, select May 1, 2011, and then today's date in the stop date. (There are a few aircraft that have deferred items dating back to May, 2011)
 - b. Select Resource Type (DA-40, PA-28-181, etc...)
 - c. Select Resource – Select your Tail number (N-Number).
 - d. Select Discrepancy Status – Deferred.
 - e. Remove tick or check from Show WO#. You do not need this.
5. Select output format. The report will pop up in a new window.

Example on next page...

Researching open discrepancies using RMS report:

Below is an example of a report in PDF format indicating a deferred Vision1000 Camera on N28154:
